

VANAIR RECEIVES AWARD IN AEM MARKETING COMMUNICATION CONTEST.

New Buffalo, MI - June 2006 - Vanair Manufacturing, Inc. was awarded 3rd place in the "Product Literature (Under \$50 Million Division)" category in their "Measures of Success" marketing communications program by The Association of Equipment Manufacturers (AEM). The awards were announced at the association's recent marketing communications seminar in Baltimore, Maryland.

The awards which are sponsored by AEM and its Publications in Construction and Agriculture (PICA) subgroup, recognize excellence in the off-road (construction, agriculture, forestry, mining and utility) manufacturing industry. Vanair's entries were entered in the "Under \$50 Million Revenue Division for Product Literature." The entries were judged by a panel of business-to-business agencies, industrial marketers, university marketing communications professors and PICA publishers. Judges score the entries independently and the AEM Statistical department tabulates the scores.
